Wat is SnapScan?

SnapScan is ‘n digitale betalingstelsel as alternatief vir kaart- en kontant betalings, Dit laat jou toe om betalings te maak sonder kaart of kontant. Alhoewel SnapScan deur Standard Bank ontwikkel is, kan enige kliënt van ‘n ander bank sy Master of Visa krediet- of debietkaart aan die app koppel om digitale betalings via die app te maak.

Sodra jou kaart op die app geregistreer is, is dit so eenvoudig as om die SnapCode (wat hier regs verskyn) te scan en die bedrag in te sleutel wat jy wil betaal. Die betaling word dan teen jou kaart geprosesseer en aan die handelaar oorbetaal.

Jou kaart details word beskerm deur ‘n PIN nr wat jy kies en alle vertroulike inligting word op jou foon *encrypt* om dit te beskerm. Geen kaart besonderhede word aan die handelaar gestuur nie.

SnapScan is gratis en geen fooie is betaalbaar nie.

Waar kan SnapScan gebruik word?

SnapScan kan by enige handelaar gebruik word wat die SnapCode vertoon. Dit kan gebruik word om PMJ subs, Munisipale rekeninge, DStv, TV lisensies, restaurante ens te betaal.

Hoe om SnapScan te gebruik

Laai die SnapScan app af van Google Play Store of Apple App Store; koppel jou krediet- of debietkaart aan die app; kies ‘n PIN en jy is gereed om te Snap & Betaal.

Maak die app oop, druk die kamera knop en scan die SnapCode. Jou naam en van sal verskyn wat gebruik sal word as verwysing maar dit kan gewysig word na enige ander beskrywing. Sleutel die bedrag in om te betaal en kliek op Pay en die betaling sal teen jou kaart geprosesseer word en bewys van betaling sal in die app vertoon.

Capitec kliënte

Capitec kliënte moet eers hul kaart aktiveer vir “*SecureCode online shopping*”. Dit kan gedoen word deur ‘n Capitec tak te besoek en te versoek dat kaart aktiveer word vir “*SecureCode online shopping”.*

of

Die kaart kan aktiveer word op die Capitec app. Maak die Capitec app oop en kies “Cards” op hoofmenu; teken aan en kliek op kaart om te aktiveer. Kliek op “*Register Online Shopping*” en kies ‘n daaglikse limiet vir aanlyn aankope. Kliek op Next en kliek dan links van twee “Agreement clauses” en kliek Accept. ‘n Aktiveringskode sal binne 24 uur via sms gestuur word.

Sodra die sms ontvang word, gaan na https://www.capitecbank.co.za/mastercard-securecode-activation op foon of pc en volg die instruksies om kaart te registreer vir “online shopping”. Die kaart is daarna gereed om aan die SnapScan app gekoppel te word .

Vir hulp om op die app te registreer of om Capitec kaart te akiveer, stuur vrae via WhatsApp na 072 4338 747.

What is SnapScan?

SnapScan is a digital payments system that eliminates the need for cards, cash and paper for both merchants and customers. While SnapScan is a Standard Bank product, customers can use any Master or Visa credit- or debit card from any bank to transact using the app.

Once your card details have been linked to the app, it is as simple as scanning the SnapCode at the merchant's location and entering the amount to pay. The payment is then processed directly from your card. If you have a copy of the SnapCode as displayed on the right, you can scan and pay from anywhere.

Security wise, you card is secured by a PIN code that you choose during the setup process and the data on the phone is also encrypted on the phone to keep it secure. No card details are transmitted to the Merchant.

SnapScan is free and no charges are applicable to the user.

Where can SnapScan be used?

SnapScan can be used at any merchant who displays the above SnapCode. It can also be used to pay for Paarl Muslim Jamaa subs, Municipality accounts, DStv subscriptions, TV Licenses, Restaurants, Traders at flea markets etc

How to use SnapScan

Download the SnapScan app from Google Play Store or Apple App Store; link your credit- or debit card to the app; select a secure PIN and you're ready to Snap & Pay.

Open the app; press the app camera button and point and scan the above SnapCode. Your name & surname will display and will be used as reference by the Merchant but it can be changed to anything else. Enter the amount you wish to pay and tap on Pay and the payment will be processed and your proof of payment will display in the app.

Capitec account holders

Capitec account holders will need to activate their card for SecureCode online shopping. This can be done by visiting a Capitec branch and requesting card activation for SecureCode online shopping

or

The card can be activated on the Capitec app by tapping on Cards on the main menu; sign on and tap on the card to activate. Tap on Register Online Shopping and add a daily limit for online card purchases. Tap on Next and tap to left of two Agreement clauses and Accept. An activation code will be send via sms within 24 hours.

When the sms is received, open https://www.capitecbank.co.za/mastercard-securecode-activation on your phone or computer and follow the instructions to activate your card for online shopping. The card is now ready to be linked to the SnapScan app.

For assistance to register on the app or the Capitec card, send your questions via WhatsApp to 072 4338 747.
